Ezi-lift Clothesline

A popular choice for unpowered clothes drying in apartments and townhouses.

It is designed for indoor clothes drying where there is sufficient ceiling height but room space is limited. Applications include above laundry sinks and benches and on balconies.

The unique design enables the frame to be raised and lowered by operating an endless chain. This unit locks at any desired height. The room space required is 1.3m x 470mm.

6m of hanging space
Capacity 5kg spun dry washing
Assembled makes 5 x 1.2m stainless steel long rods
Can be wall mounted with separately purchased brackets
Designed for ceiling heights up to 2.8m
